

HORNET.EMAIL

Do not compromise: Combine Microsoft 365 with cost-effective mailboxes within your existing domain or use Hornet.email as a stand alone solution.

Hornet.email: The cloud-based corporate communications platform with the market's most efficient filter for protection against spam and malware directly integrated. The email and collaboration environment, consisting of mailbox, calendar and address book, offers users maximum protection against spam, phishing and other cyber threats based on multiple layers of security and AI-based analysis. The market's highest guaranteed spam and virus detection rates protect users not only from annoying email flooding, but also from infection by ransomware or spyware.

BENEFITS OF HORNET.EMAIL:

✓ Easy, fast onboarding

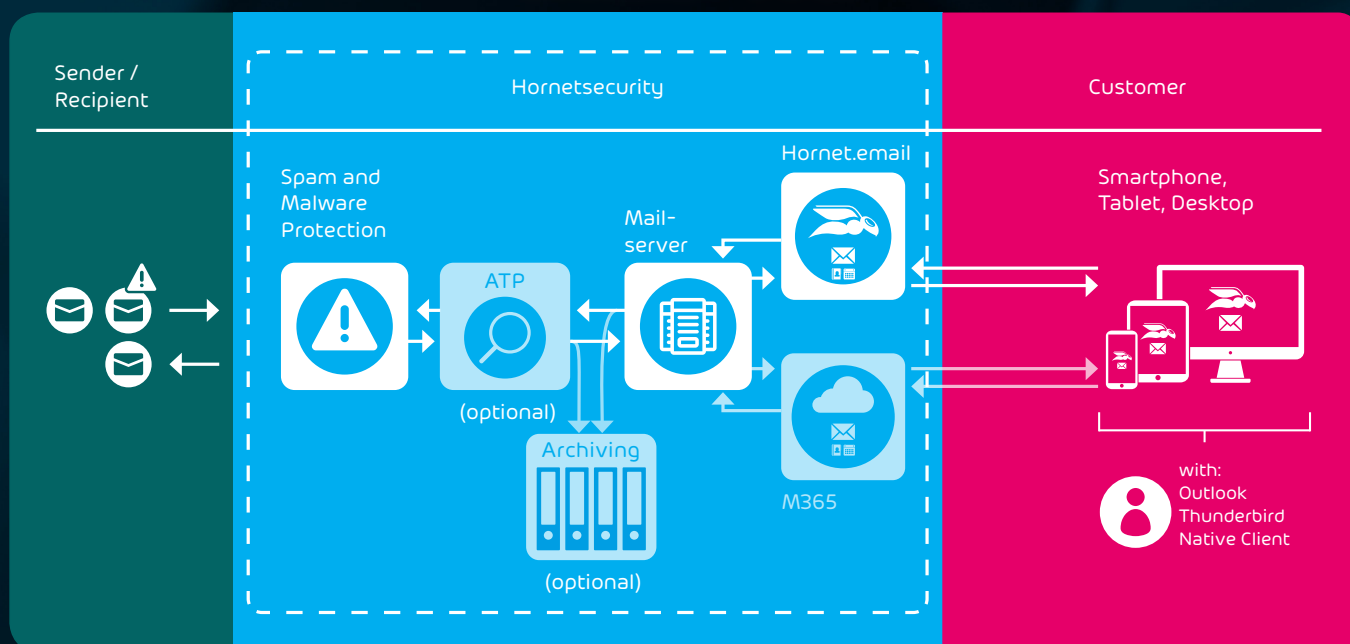

✓ Can be combined with M365

✓ Central control

✓ Synchronization on all devices

✓ Hosting in certified data centers

EXAMPLE OF HORNET.EMAIL INTEGRATION IN THE EMAIL MANAGEMENT SYSTEM

RELIABLE FEATURES AND EFFICIENT ANALYSIS MECHANISMS FOR SECURE CORPORATE COMMUNICATIONS:

Synchronization across all devices: Hornet.email can be accessed via a web interface, native clients or Outlook clients from all common modern PCs (Windows, Mac, Linux) and mobile devices (iOS, Android). Users can access not only all their emails, but also their calendar and tasks - simply, securely and without compromise.

Collaborative compatibility: Hornet.email supports various calendar and task formats such as WebDAV, CalDAV, Card-DAV, WebDav, Webcal and ical.

Guaranteed availability: The average annual availability of email using SMTP and Hornet.email interfaces and the web interface is 99.99%.

Automatic storage of emails: Once a day, all email in the mailbox is backed up. This backup is kept for 14 days.

Automated encryption via TLS: Emails are sent via a TLS encrypted channel, provided that the counterparty supports TLS transmission.

Deny and allow lists: Authorized users can maintain their own allow- and deny lists. They can be configured in several ways, e.g. using the Hornetsecurity control panel or quarantine report.

Content filter for file attachments: Unwanted attachments can be rejected or moved to quarantine. Adjustable content filter, protection against malware and enforcement of company policies, size limitation of emails adjustable protection against impairment of the mail server and mail traffic due to excessive data volume.

Compliance filter: Create specific rules for automated application to inbound and outbound email.

HORNET.EMAIL: FLEXIBLE, SIMPLE AND SAFE WITHOUT COMPROMISE

The booking options and combination possibilities for new as well as existing customers make Hornet.email a flexible all-around and offer users a collaboration platform tailored to their needs with a variety of security features.

Hornet.email can be booked in two different packages: The **Starter Package** includes the cloud-based Hornet.email platform and Hornet.email's Spam and Malware Protection. With the Hornet.email **Enterprise Package**, you also benefit from the services Advanced Threat Protection, Email Encryption and Archiving.

The **Hornet.email Add-On** offers existing customers the possibility to add as many mailboxes as they wish. Each mailbox is hosted on Hornetsecurity's servers and receives exactly the same protection as the existing mailboxes. Hornet.email can be combined with Microsoft 365 within your existing domain or is available as a stand alone solution.
