

Six heroes, Six missions

One goal: make Microsoft 365 safer for everyone

#CybersecurityAwarenessMonth

This month, the

SECURITY LEAGUE

Springs into Action

#CybersecurityAwarenessMonth

CAPTAIN SECURITY

Mission: Hunt down phishing campaigns before they land.

Why engaged: Email threats still account for over 70% of attacks. Captain Security is patrolling every inbox to catch malicious links and attachments before users click.

Pause before you click.
Check the sender and hover
over links first.

#CybersecurityAwarenessMonth

AGENT AWARENESS

Mission: Train 1,000 new human firewalls this month.

Why engaged: 95% of breaches involve human error. Agent Awareness is running daily micro-trainings and phishing simulations to sharpen instincts.

If an email pressures you
to act fast, slow down.
Urgency is a red flag.

#CybersecurityAwarenessMonth

BACKUP MASTER

Mission: Test every backup, twice.

Why engaged: Ransomware doesn't just lock data; it can corrupt backups. Backup Master is ensuring clean, recoverable versions exist for every client.

Backups are useless if
you've never tested a restore.

#CybersecurityAwarenessMonth

COMPLIANCE GUARD

Mission: Seal 100 data leak points this month.

Why engaged: Sensitive files often slip out unnoticed. Compliance Guard is scanning and blocking risky sharing to keep data in safe hands.

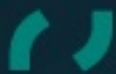

Only share data with those who need it and review permissions regularly.

#CybersecurityAwarenessMonth

DR. T

Mission: Audit every Microsoft 365 tenant for gaps.

Why engaged: Inconsistent policies leave doors open. Dr. T is automating governance to close gaps across all tenants in record time.

Standardize security settings across all accounts to avoid weak spots.

#CybersecurityAwarenessMonth

AI.MY

Mission: Detect and neutralize AI-powered attacks.

Why engaged: Cybercriminals are using AI to craft smarter, harder to spot attacks. AIMY is scanning conversations, verifying recipients, and analyzing suspicious activity in real time.

Even convincing messages
can be fake. Always verify
unexpected requests.

Join the Mission this

Cybersecurity Awareness Month

- “ Pick your hero's mission and share it with your network.
- “ Use [#CybersecurityHero](#) to show your commitment to our cause.
- “ Encourage your team to follow the CybersecurityAwareness Month tips all month long.

Every action counts

Which mission will you take on?
